

## Time and Labor WorkCenter: Managers

Budget Managers with full-time staff are responsible for reviewing departmental Paid Time Off Reports at least once every month. The Time and Labor WorkCenter also offers several resources to review reported and paid time in the Links Section. Under the View Time & Exceptions Heading there are links to review not only employee timesheets, but also, timesheet exceptions, monthly, weekly, and daily time calendars.

### Reviewing Monthly, Weekly, or Daily calendars

With each calendar type, a reviewer can enter search criteria applicable to the review method. A reviewer can enter as much or as little criteria as is appropriate for his or her review.

For example, to view employee hours reported only within one department, search for the applicable department ID and click Get Employees. Select Save Criteria to have this department included in the default search criteria.

The screenshot shows the 'Weekly Time Calendar' interface. It features a table for 'Employee Selection Criteria' with columns for 'Selection Criterion' and 'Selection Criterion Value'. The criteria listed are: Time Reporter Group, Employee ID, Empl Record, Last Name, First Name, Department, Supervisor ID, Reports To Position Number, North American Pay Group, and Position Number. Each criterion has a search icon. To the right of the table are three buttons: 'Get Employees', 'Clear Criteria', and 'Save Criteria'. A tooltip 'Look up Department (Alt+5)' is visible over the Department search icon.

Selection Criterion	Selection Criterion Value
Time Reporter Group	<input type="text"/>
Employee ID	<input type="text"/>
Empl Record	<input type="text"/>
Last Name	<input type="text"/>
First Name	<input type="text"/>
Department	<input type="text"/>
Supervisor ID	<input type="text"/>
Reports To Position Number	<input type="text"/>
North American Pay Group	<input type="text"/>
Position Number	<input type="text"/>

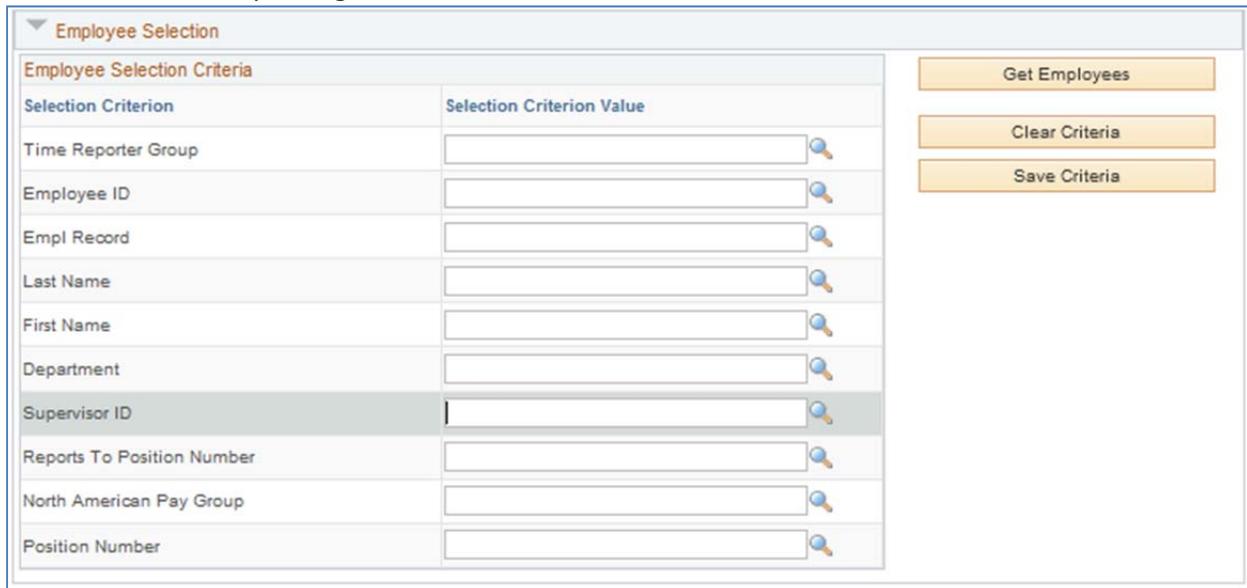

To refine that search even further, keep the department criteria and another. For example, if you wish to only review and time reported by student employees, update the North American Pay Group field and click Get Employees.

This screenshot shows the same 'Weekly Time Calendar' interface as the previous one, but with the 'Department' field populated with '422100' and the 'North American Pay Group' field populated with 'ST'. A tooltip 'Pay Group Description STU Student Earning' is visible over the 'ST' entry in the North American Pay Group field. The 'Get Employees', 'Clear Criteria', and 'Save Criteria' buttons remain on the right.

Selection Criterion	Selection Criterion Value
Time Reporter Group	<input type="text"/>
Employee ID	<input type="text"/>
Empl Record	<input type="text"/>
Last Name	<input type="text"/>
First Name	<input type="text"/>
Department	422100
Supervisor ID	<input type="text"/>
Reports To Position Number	<input type="text"/>
North American Pay Group	ST
Position Number	<input type="text"/>

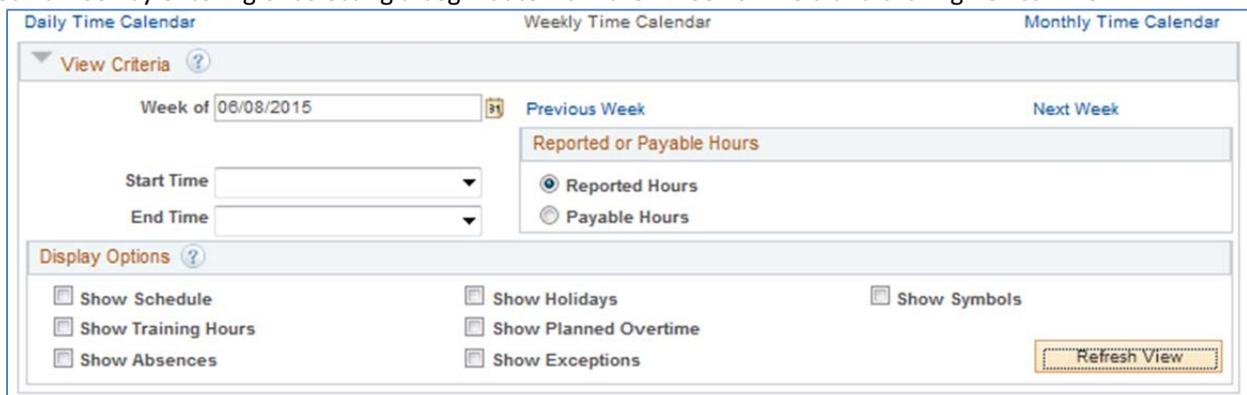

## Time and Labor WorkCenter: Managers

To view hours of student or part-time staff that you directly supervise, enter your employee ID in the Supervisor ID field or click the magnifying glass to search by name and click Get Employees. Use Reports To Position Number to filter the search results by manager for full-time staff.

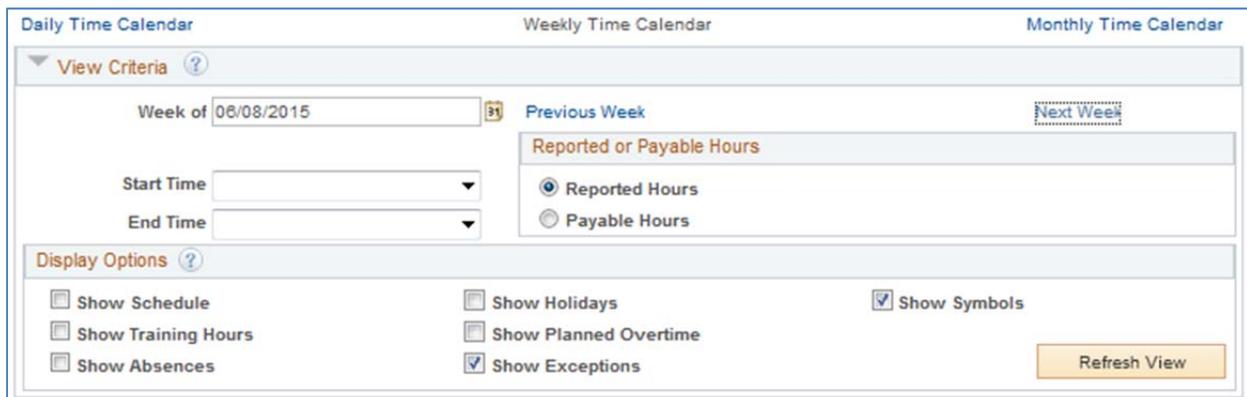

The screenshot shows the 'Employee Selection' section of a web application. It features a table with two columns: 'Selection Criterion' and 'Selection Criterion Value'. The criteria listed are: Time Reporter Group, Employee ID, Empl Record, Last Name, First Name, Department, Supervisor ID (highlighted), Reports To Position Number, North American Pay Group, and Position Number. Each criterion has a search icon to its right. To the right of the table are three buttons: 'Get Employees', 'Clear Criteria', and 'Save Criteria'.

Once you have applied the desired Employee Selection Criteria, update the View Criteria. Quickly navigate to a specific week by entering or selecting a begin date from the "Week of" field and clicking Refresh View

The screenshot shows the 'View Criteria' section of a web application. It includes a 'View Criteria' dropdown menu, a 'Week of' field with a calendar icon, and 'Previous Week' and 'Next Week' buttons. Below these are 'Start Time' and 'End Time' dropdown menus. A 'Reported or Payable Hours' section contains radio buttons for 'Reported Hours' (selected) and 'Payable Hours'. A 'Display Options' section has checkboxes for 'Show Schedule', 'Show Training Hours', 'Show Absences', 'Show Holidays', 'Show Planned Overtime', 'Show Exceptions', and 'Show Symbols'. A 'Refresh View' button is located at the bottom right.

Easily navigate forward and backward while keeping the same Employee Selection Criteria by selecting Previous Week or Next Week. Select Show Exceptions and Show Symbols and click Refresh View to view additional information.

This screenshot is identical to the previous one, but with two changes: the 'Show Symbols' checkbox is now checked, and the 'Refresh View' button is highlighted with a dashed border.

## Time and Labor WorkCenter: Managers

For ease of viewing, you can temporarily collapse the Time and Labor WorkCenter by clicking the double arrow

The WorkCenter can be expanded by clicking the arrows again

The calendar information can be downloaded into Microsoft Excel to be by clicking the Download link at top right corner of the Calendar

## Time and Labor WorkCenter: Managers

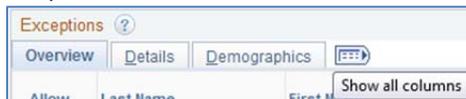

### Manage Exceptions

Timesheet exceptions are generated when there is a processing issue with reported time that needs to be investigated and updated by the manager or reviewer. Each exception generated has an associated severity level. The High Severity exceptions result in an employee not receiving pay for the reported hours and need to be addressed by the manager or reviewer immediately.

Use the Exceptions link and select Get Employees to review timesheet exceptions that need to be resolved.

Filtering Options allow you to filter the results by date, employee, and severity levels. There are tabs for Overview, Details, and Demographics, or you can expand to show all columns.

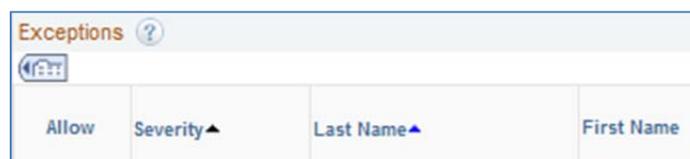

For example, you may find it beneficial to Search for all Exceptions, filter by High severity exceptions and then sort by employee, type of exception, or date reported. In this manner, you can prioritize the view to address and resolve the exceptions efficiently.

Exceptions can easily be sorted by one or more columns in ascending or descending order. Column order can also be changed by dragging and dropping the column header to the new desired order. The default order for viewing Exceptions is alphabetical by Last Name. To sort the results by date (oldest to newest) and then by employee ID and then by exception description,

The results will now be ordered by Severity in ascending order (High, Medium, Low) and then sorted further by Last Name within each Severity level.

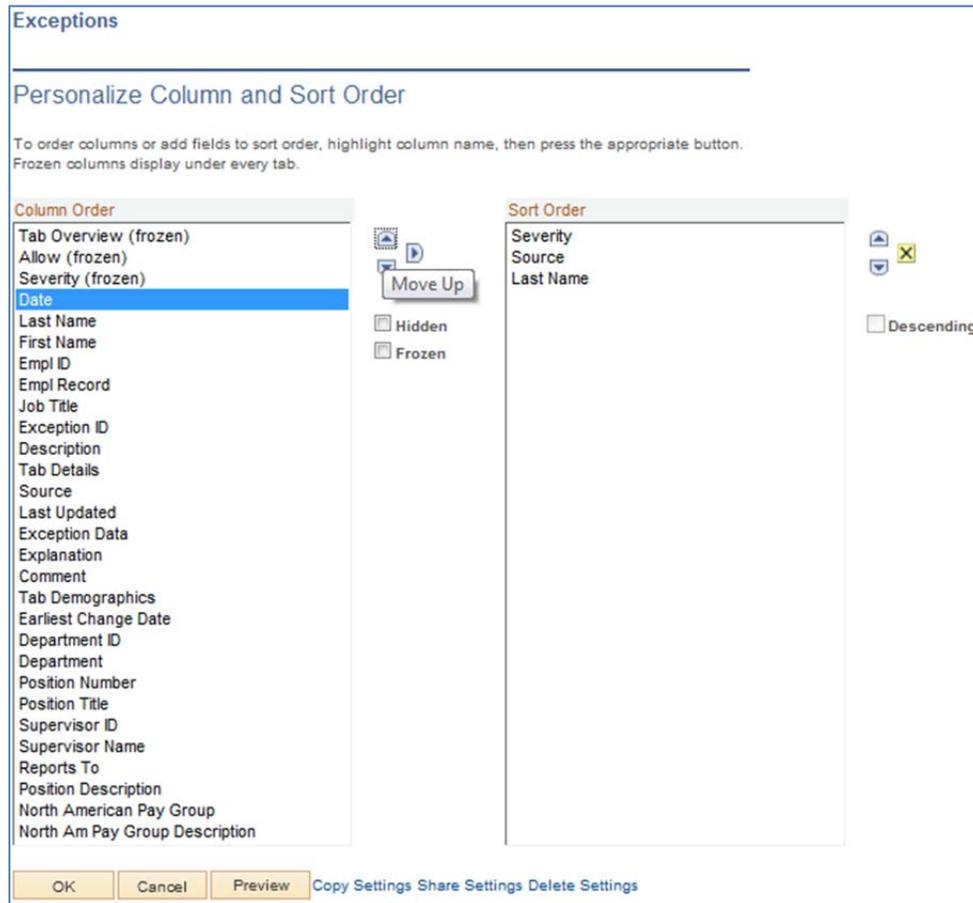

To change the order from ascending to descending, click the column header again and see the change reflected when the arrow switches from pointing up to pointing down.

## Time and Labor WorkCenter: Managers

These settings can also be updated and saved by selecting the Personalize option from the top-right corner of the table, moving the columns up or down, prioritizing the order of rows shown and saving the changes.

For example, in this screenprint, the Date column has been moved up beside the severity level. To preview the proposed changes before saving, select the Preview button. If the changes are as you expect, select OK for changes to be saved.

The Exception resolved can be downloaded into a Microsoft Excel spreadsheet. This can be a helpful tool when reviewing each exception by employee or exception type.

To resolve an exception, determine if an error exists with the reported time or if there is an invalid value. For example, a common error occurs when a WebClock employee forgets to clock in or out. If a High severity exception is not resolved, the hours will not be paid to the employee. It is important to identify and address any exceptions so that the hours worked can be paid to the employee timely. While reviewing timesheet exceptions, you may identify areas or employees that commonly encounter these errors. The timesheet exceptions can be discussed and resolved together to minimize recurrence of the issue in the future.

In addition to the Exceptions link under the View Time & Exceptions heading, you will also see exceptions directly on the employee's timesheet or in the calendar view when the Show Exceptions box is checked from the Display Options. Exceptions are displayed with the following icon  and can be clicked to display the exception detail.

## Time and Labor WorkCenter: Managers

### Manager Search Options

To save search criteria, navigate to the Manager Search Options and save the updates. This is an especially useful feature if you are responsible for reviewing and correcting employee timesheets for certain employee types or groups.

The Manager Search Options page can be accessed within the Time and Labor Work Center Links Section under the Time Approval Settings Heading

The Manager Search Options page allows you to select the default criteria and view options within the Time and Labor WorkCenter.

Manager Search Options	
Select Default Criteria and Options	
<b>Loading of Matching Employees</b> <input type="radio"/> Auto Populate Results <input checked="" type="radio"/> Prompt for Results	<b>Default Criteria Presentation</b> <input type="radio"/> Show Criteria List Collapsed <input checked="" type="radio"/> Show Criteria List Expanded

For example, if most of your paid time off review is for one department, it is possible to update the Manager Search Options so that the search criteria default to that department.

Employee Selection Criteria ?			
Description	Selection Criterion Value	Include in Criteria	*Include in List
Time Reporter Group	<input type="text"/>	<input checked="" type="checkbox"/>	Do Not Include
Employee ID	<input type="text"/>	<input checked="" type="checkbox"/>	Include <input type="text"/>
Empl Record	<input type="text"/>	<input checked="" type="checkbox"/>	Include <input type="text"/>
Last Name	<input type="text"/>	<input checked="" type="checkbox"/>	Include
First Name	<input type="text"/>	<input checked="" type="checkbox"/>	Include
Department	<input type="text"/>	<input checked="" type="checkbox"/>	Include Code and Description <input type="text"/>
Supervisor ID	<input type="text"/>	<input checked="" type="checkbox"/>	Include Code and Description <input type="text"/>
Reports To Position Number	<input type="text"/>	<input checked="" type="checkbox"/>	Include Code and Description <input type="text"/>
North American Pay Group	<input type="text"/>	<input checked="" type="checkbox"/>	Include Code and Description <input type="text"/>
Position Number	<input type="text"/>	<input checked="" type="checkbox"/>	Include Code and Description <input type="text"/>

## Time and Labor WorkCenter: Managers

It can also be helpful to increase the number of rows returned on the daily, weekly, monthly calendars so that you are able to view more employee hours on a single page.

Data Loading in Time Management ?		
Folder	Portal Label	*Chunk Size
Approve Time and Exceptions	Payable Time	<input type="text" value="300"/>
Approve Time and Exceptions	Reported Time	<input type="text" value="300"/>
Manage Schedules	Manage Schedules	<input type="text" value="300"/>
Report Time	Absence Request	<input type="text" value="10"/>
Report Time	Timesheet	<input type="text" value="300"/>
View Time	Daily Time Calendar	<input type="text" value="50"/>
View Time	Monthly Time Calendar	<input type="text" value="50"/>
View Time	Weekly Time Calendar	<input type="text" value="50"/>

 Save

Once you have made the desired updates to the Manager Search Options, click Save. The default search criteria from your Manager Search Options will apply to all links under the View Time & Exceptions Heading. Navigate back to the Timesheets, Exceptions, and Time Calendars to view the default selection criteria. You can make changes to default search criteria at any time by navigating back to the Manager Search Options page.

Contact Payroll Services if any of the Employee Selection Criteria displayed above are not available to you. Time Managers who saved search criteria prior to the most recent PeopleSoft Payroll Upgrade may need an update to their settings in order to see all options.

For any questions regarding employee timesheets, tools, and exceptions please contact Payroll Services at [payroll@depaul.edu](mailto:payroll@depaul.edu) or at 312-362-8692.
